Bruno Malagoli

FULLSTACK WEB DEVELOPER

Always looking forward to learn more. Excellent team player.
I consider myself a very curious person and a native learner.

-EXPRESS   -HTML
-REDUX   -CSS
-REACT ROUTER   -NEXT UI

LANGUAJES

Spanish- Native
English- B2
Catalan- Native

PROJECTS

NIN-JS WEBSITE

REACT + CHAKRA UI + TYPESCRIPT +
MONGOOSE +TEAMWORK

An educational website with Ninja theme where you can test your knowledge in JavaScript with multiple code quizes. It also provides educational content between questions, so you can also learn while answering the questions. I made this project with my Alkemy team.

WEBSITE: https://nin-js.netlify.app/
GitHub: https://github.com/BrunoMalagoli/NinJS-Vite

POKE-APP

NEXT JS + NEXT UI + TYPESCRIPT

Pokédex App using Static Site Generation and Incremental Static Regeneration from Next Js to generate all the Pokemons at build time incrementing exponentially the web performance. Incremental Static Regeneration generates a new static file for the pokemons that are not generated on build time, and generates it on request time.
